

History of veterinary medicine and deontology

ECTS: 1.00

SUBJECT MATTER CONTENT

LECTURE

The contents of the course include the history of veterinary medicine as a profession and a science. The subject describes people's views on animal diseases and their treatment from ancient times to the present day. There are presented methods of combating infectious animal diseases, veterinary device production and their improvement, and the development of the veterinary professional literature. Much attention is paid to discuss the history of the development of veterinary education, both in the world and in Poland. There are discussed many issues, including organization of veterinary services for animal health care and its influence on animal treatment, forensic veterinary, military veterinary medicine, as well as the history of surveillance of animal products. The deontology is an integral part of the course, discussing the development of deontological codes and forming the right attitude at work, respecting the rules of professional ethics. The complement of the course is to present the history of the most important discoveries in biology and medicine.

TEACHING OBJECTIVE

The purpose of education is to familiarize students with the history of the veterinary profession, the changing tasks of the veterinary service. In addition, an important task is to teach future veterinarians act according to moral principles, in accordance with the deontology

DESCRIPTION OF THE LEARNING OUTCOMES OF THE COURSE IN RELATION TO THE DESCRIPTION OF THE CHARACTERISTICS OF THE SECOND LEVEL LEARNING OUTCOMES FOR QUALIFICATIONS AT LEVELS 6-8 OF THE POLISH QUALIFICATION FRAMEWORK IN RELATION TO THE SCIENTIFIC DISCIPLINES AND THE EFFECTS FOR FIELDS OF STUDY:

Symbols for outcomes related to the discipline:

R/WA_P7S+++

Symbols for outcomes related to the field of study:

B.U1. +, K.2.+ , K.12.+ , A.U16. +, K.9.+ , A.U12. +, C.W2. +, A.W22. +

LEARNING OUTCOMES:

Knowledge:

W1 – The student after finishing the subject knows the history of biological and veterinary sciences, as well as history of the veterinary education and importance of veterinarians in the military, public health and the development of veterinary science. An integral part of knowledge is the study of professional morality, based on historical and contemporary deontological codes.

Skills:

Legal acts specifying learning outcomes:
682/2020
Disciplines: Veterinary science
Status of the course:Obligatoryjny
Group of courses:A - przedmioty podstawowe
Code: ISCED 0841
Field of study:Veterinary Medicine
Scope of education:
Profile of education: General academic
Form of studies: full-time
Level of studies: uniform master's studies
Year/semester: 1/2

Types of classes: Lecture
Number of hours in semester:Lecture: 15.00
Language of instruction:Polish
Introductory subject: Latin language
Prerequisites: Basic knowledge of general history

Name of the organisational unit conducting the course:Katedra Fizjologii Klinicznej
Person responsible for the realization of the course:prof. dr hab. wet. Sławomir Gonkowski
e-mail:
slawomir.gonkowski@uwm.edu.pl

Additional remarks:

U1 – The student after finishing the subject obtains the ability to use knowledge about the profession and also obtains the ability to apply the achievements of many generations of veterinarians in order to solve problems regarding animal and public health, in accordance with the principles of the deontological code.
