ABOUT FUTURE TALENT PROGRAMME

Future Talent Programme – technical track is a one-year trainee program to develop your engineering skills and bring you leading technical knowledge in an accelerated way. You will be part of a truly global company with a dynamic, innovative mindset as well as strong roots in a technological environment.

From day 1 you will be delivering results as a true team member and hold a real position. Your manager will plan the content of your programme and support you in your development journey. After the programme finishes you will have gained great experiences to help you continue your exciting career within our company.

What you will do

As an Automation Engineer you will join our team in Olsztyn and you will be involved in the following activities to develop and strengthen your abilities towards:

- Focusing on automation solutions for cheese lines, design and deliver solutions to customers all over the world
- Design, implementation and commissioning of machinery and process control systems, using SCADA and MES systems (in connection with PLC controllers)
- Designing automation systems for the food industry (servers, networks, virtual environment, etc.)
- Travel in and outside the country
- Prepare FAT documentation and execute it.
- Propose design changes/improvements for future projects.
- If needed, troubleshoot during installation and commissioning

Who you are

We believe you have:

- You have finished recently or are about to finish your Industrial/Mechanical/Automation Engineering Bachelor or Master Degree (graduation year 2020 or 2021)
- MS Office level advanced
- 5S methodology
- Basic WCM knowledge
- Loss concept
- Fair communication skills
- Be able to work independently as well as part of a team, structured approach
- Administrative, organized, systematic and consistent, result oriented with a strong personal drive
- Willingness to travel
- Native Polish speaker and good spoken and written English
- Driver license cat. B

We offer you

- Variety of exciting challenges with wide opportunities for development and training in a truly global landscape
- Culture that pioneers spirit of innovation where our engineering genius drives visible result
- Equal opportunity employment experience that values difference and diversity
- Market competitive compensation and benefits with flexible working arrangements
