

**Greenvit**<sup>®</sup>  
GREEN LABEL BOTANICALS

**No.1**

**Aronia  
berry extract  
in the world**

# About us

---

## Who we are?

**Greenvit®** is a botanical extract manufacturer from Poland. We are a dynamic team of professionals with extensive knowledge and over a decade of experience in the field of biotechnology, manufacturing, trade and marketing of botanical extracts and natural ingredients. Our roots lie in Podlasie – a region of pristine forests, herbal traditions, and authentic values.

## Our mission:

We create natural extracts dedicated to dietary supplements that support human health and well-being in harmony with nature, science, and ethics.

## Over 15 years of experience

Founded in 2010, we have successfully combined knowledge, science, and respect for nature. In our offer, we focus on cost-effective, clean label solutions, tailored to our customers' needs. We provide the best and consistent quality of our products and services.

## R&D Dept & Application Laboratory

Our R&D team can provide not only ingredients, but also ready-to-use solutions and technological support. Thanks to our application lab, we are able to offer samples of finished goods.

# Company's journey

---

**2010**

## **The establishment**

Our company was founded in 2010 with a visionary spirit and a belief in innovation.

**2014**

## **Production**

We started the production of our first botanical extracts at the factory in Zambrow.

**2015**

## **International sales**

We completed our first sale to an international Client.

**2021**

## **New possibilities**

Our new plant in Lomza was a game-changer, providing the exciting new and bigger production possibilities for our customers.

**2024**

## **Pure Innovation**

After 8 years of research, the new membrane-based technological line PureGreenLine™ is launched.

**2025**

## **Next Chapter**

Establishment of Greenvit Inc. in the USA.

# Our Origin and Brand Identity

---

*Rooted in Nature.  
Driven by Science.  
Inspired by Europe.*

Our story begins in Podlasie – one of the greenest and cleanest regions in Europe. This is where we developed our philosophy based on locality, quality, and respect for nature.

We specialize in **Northern European berries and herbal extracts**, combining traditional botanical knowledge with modern extraction technologies.

# Partnership built on quality and trust.

- **15 years** of expertise in botanical extraction and processing
- **Full control** over the supply chain – from raw material to finished extract
- **In-house** laboratories and analytical capabilities
- **Certified quality:** FSSC 22000, HACCP, GMP, HALAL, KOSHER, BIO
- Collaborations with leading **research institutions** in Europe
- A reliable **B2B partner** for global nutrition leaders

 **FSSC 22000**

Nr Cert. 16831-E15-001

# Polyphenols Explosion!

# The world's No.1 producer of Aronia extract

---

” **Aronvit®** - *The Power of Aronia, Proven by Science*

**Greenvit®** is globally recognized as the leading producer of *Aronia melanocarpa* (Michx.) Elliott extract, developed through proprietary technology and scientific expertise.

Our **Aronvit®** extract is standardized for anthocyanins (HPLC) and polyphenols (UV), ensuring full product identity, traceability, and consistency.

## Key highlights:

- **Standardized extract:**  
min. 15% anthocyanins,  
min. 25% polyphenols,  
min. 10% PACs
- Advanced quality control –  
LC-MS, HPLC, USP methods
- Local sourcing ensures complete  
traceability
- Recognized by United States  
Pharmacopeia (USP) as a scientific  
reference for *Aronia melanocarpa*.

# Clinical Research & Scientific Validation

---

## *Metabolic support backed by clinical evidence.*

A randomized, placebo-controlled clinical trial confirmed the beneficial effects of **Aronvit®** on key metabolic biomarkers in adults with hypertension and dyslipidemia.

### **Study design:**

6-week daily supplementation (50–150 mg **Aronvit®**)  
Adults aged 18–55 with known metabolic risk factors.

### **Results:**

- ↓ Total cholesterol: -21.8 mg/dL ( $p = 0.021$ )
- ↓ LDL cholesterol: -22.3 mg/dL ( $p = 0.005$ )
- ↓ LDL/HDL ratio ( $p = 0.013$ )\*\*
- ↓ ALAT activity (-9.7 IU/L,  $p = 0.037$ )\*\*
- Stabilized homocysteine levels ( $p = 0.041$ )\*\*

# Expertise in R&D and Analytical Science

---

*Science is at the heart  
of everything we create.*

At Greenvit, research and analytical precision define our work. Our in-house laboratories use advanced **LC-MS**, **HPLC**, and **UV-VIS** methods for standardization, validation, and stability testing.

## **Key strengths:**

- Proprietary R&D and analytical facilities
- Expert team of biotechnologists and chemists
- Advanced polyphenol and anthocyanin profiling
- Partnership with research centers across Europe.

# Scientific Expertise & USP Partnership

## *Setting global standards in botanical science.*

At Greenvit, we merge analytical excellence with biotechnological innovation. Our in-house R&D and QC teams ensure reproducibility and scientific rigor at every stage of extraction and testing.

### **Key Achievements:**

- Recognized as a scientific contributor to the United States Pharmacopeia (USP)
- Proprietary analytical method for *Aronia melanocarpa*, cited in the USP monograph
- Continuous cooperation with European academic and industry partners
- Specialists in method validation, polyphenol quantification, and stability testing.

# Contract Manufacturing

---

*From idea to  
ready-to-market solution.*

## **Scope of services:**

- Formula design and R&D development
- Selection of raw materials and standardized extracts
- Production of extracts, blends, and concentrates
- Preparation of liquid, powder, and capsule forms
- Private label & co-branding opportunities
- Full documentation and EU/FDA compliance.

## **Why Greenvit:**

- In-house R&D and QC laboratories
- GMP, FSSC 22000, KOSHER, HALAL, BIO certified
- Flexible and partner-focused approach
- Experience with global nutraceutical brands.

# Quality and Certification

*Quality you can trust.*

**Our facilities operate in full compliance with international standards:**

- FSSC 22000, HACCP, GMP, HALAL, KOSHER
- Each stage – from raw material to final extract – undergoes strict quality control
- Transparency and safety confirmed by audits from clients and certifying bodies.

Nr Cert. 16831-E15-001

# Branded Extracts

*Science-based. Nature-inspired.*

We use/apply soft extraction technique, which means we do not use any aggressive or chemical solvents. The extraction is only water and ethanol based (according to Pharmacopeia standards). Soft extraction and no carrier technology offer possibility of obtaining 100% native extracts.

## Examples:

- **Aronvit®** - diabetes and metabolic health
- **Fenactive®** - antiviral support
- **CherryGo®** - regeneration after sport activity
- **Oculoxin®** - visual health and support
- **Calmomix®** - sleep good, feel calm, live well

Our Branded Extracts line represents **Greenvit®**'s dedication to innovation, quality, and scientific integrity. Each extract is standardized, tested, and developed by our in-house R&D team to ensure consistent potency and proven functionality.

**METABOLIC HEALTH BOOST**  
**FAVORABLE IMPACT ON LIPID PROFILE**  
**ANTI-INFLAMMATORY ACTIVITY**

*Aronia melanocarpa (Michx.) Elliott*

## What is ARONVIT®

ARONVIT® is a unique, standardized extract from selected aronia berries. As a result of our own technology development efforts we have obtained a pioneering, prime quality extract with a rich anthocyanin content. Thanks to a high content of anthocyanins,

ARONVIT® extract shows a wide range of beneficial health results, including a number of positive metabolic changes.

## Composition & Standardization

- **Anthocyanins (HPLC):** ≥ 15% (as Cy-3-glucoside)
- **Polyphenols (UV-VIS):** ≥ 25% (as catechin)
- **Proanthocyanidins (PAC, DMAC):** ≥ 10%
- Contains anthocyanins (Cy-3-gal, Cy-3-ara, Cy-3-xyl, Cy-3-glu), flavonols, flavanols, and phenolic acids.
- Form: dark purple to black fine powder, suitable for syrups, capsules, tablets.

## Recommended Use & Dosage

**Suggested daily intake:**

50-150 mg

**Target groups:**

- individuals with metabolic disorders (diabetes, insulin resistance, dyslipidemia)
- overweight and obese individuals
- people exposed to oxidative stress (pollution, low-antioxidant diet)

aronvit.com

## Mechanisms of Action

- Anthocyanins regulate lipid and glucose metabolism, inhibit lipid peroxidation and lipid-processing enzymes.
- Influence on GLP-1 via DPP-IV inhibition – potential in type 2 diabetes management.
- Antioxidant & vascular protection: strong ROS scavenging activity, endothelial protection, microcirculation support.
- Anti-inflammatory activity: regulation of inflammatory mediators and prostacyclin (PGI<sub>2</sub>), anti-aggregation effect.

## Benefits

- ✓ Supports healthy metabolism and weight management
- ✓ Reduces total and LDL cholesterol
- ✓ Decreases triglyceride levels, improves lipid profile
- ✓ Enhances insulin sensitivity and blood sugar control
- ✓ Protects vascular health and microcirculation
- ✓ Strong antioxidant activity
- ✓ Natural anti-inflammatory action

IMMUNITY  
COLD AND FLU  
INFECTIONS

*Sambucus nigra L.*

*Aronia melanocarpa (Michx.) Elliott*

## What is FENACTIVE®

FENACTIVE® is a standardized complex of plant extracts, rich in polyphenols, designed to support and restore the body's immunity, in particular against upper respiratory tract infections (URTI) of viral and bacterial origin. *Aronia melanocarpa (Michx.) Elliott* + *Sambucus nigra L.* contain a broad range of anthocyanins. The combination of these two extracts results in a complex with

enhanced anthocyanin diversity. As a result of our own laboratory work on the formulation, we have obtained an innovative specific complex with an extended, synergic spectrum of biologically active ingredients

## Composition & Standardization

FENACTIVE® is a patented complex of standardized extracts from *Aronia melanocarpa (Michx.) Elliott* and *Sambucus nigra L.* (elderberry) in a 2:1 ratio.

- **Anthocyanins (HPLC): 10–30%**
- **Polyphenols (UV): 15–50%**
- Form: purple to dark violet powder, suitable for capsules, tablets, liquid forms.
- Production based on contracted local sources of raw materials, ensuring full control over identity and quality.
- Confirmed by Polish patent PL245254B1

## Recommended Use & Dosage

### Suggested daily intake:

200–250 mg

### Target groups:

- children prone to frequent respiratory infections
- elderly individuals with age-related decline of the immune system
- people seeking natural support in prevention and recovery from viral and bacterial respiratory tract infections

fenactive.com

## Mechanisms of Action

- Blocking viral adhesion to host cells and penetration of viruses
- Inhibition of viral replication and spread from cell to cell (neuraminidase inhibition)
- Stimulation of immune response, including increased production of IL-6 and TNF- $\alpha$
- Antioxidant activity – high ORAC values, reduction of oxidative stress markers
- Antibacterial effects linked to flavonoids, triterpenes, lectins, and polyphenolic compounds present in aronia and elderberry

## Benefits

- ✓ Strengthens the immune system and supports body's natural defenses
- ✓ Antiviral action against respiratory tract infections (influenza, coronaviruses, adenoviruses, herpesvirus)
- ✓ Antibacterial properties against pathogens such as *Staphylococcus aureus* and *Escherichia coli*
- ✓ Reduces oxidative stress and inflammation, restoring balance between antioxidative and pro-oxidative processes
- ✓ Synergistic spectrum of biologically active compounds from aronia and elderberryovit-C

REGENERATION AFTER SPORT ACTIVITY  
REDUCTION OF MUSCLE SORENESS  
STIMULATION OF THE IMMUNE SYSTEM

*Prunus cerasus* L. (Vistula)

*Aronia melanocarpa* (Michx.) Elliott

## What is CHERRYGO®

CHERRYGO® is a standardized complex of fruit extracts rich in polyphenols, designed to support the body's recovery and reduce muscle soreness after strong physical exertion. It is composed of tart cherry fruit *Prunus cerasus* L. (Vistula) and aronia berry *Aronia melanocarpa* (Michx.) Elliott, each offering a different but complementary set of polyphenols, including

anthocyanins. Such a combination has been widely proven to support human health. As a result of our own laboratory research on the formulation, we have obtained an innovative specific complex with an extended, synergistic spectrum of biologically active ingredients.

## Composition & Standardization

- Tart cherry Vistula extract: ≥15% polyphenols, ≥3% anthocyanins (DER 40:1)
- Aronia melanocarpa extract: ≥50% polyphenols, ≥25% anthocyanins (DER 70:1)
- Form: dark red to violet powder, suitable for capsules, tablets, liquid formulations
- Dual standardization ensures reproducibility and high concentration of bioactive compounds
- Produced from carefully selected raw materials under controlled quality conditions

## Recommended Use & Dosage

### Suggested daily intake:

200–400 mg

### Target groups:

- athletes and physically active individuals
- people experiencing muscle soreness and post-exercise fatigue
- individuals exposed to high oxidative stress
- people seeking natural support for recovery and sleep quality

cherrygo.pl

## Mechanisms of Action

- Anthocyanins and polyphenols reduce oxidative stress and inflammation in muscle tissue
- Inhibition of inflammatory mediators (e.g., COX-2, NF- $\kappa$ B) leading to decreased muscle soreness
- Modulation of melatonin metabolism, supporting sleep quality and regeneration
- Improvement of microcirculation and endothelial function through vascular protective effects

## Benefits

- ✓ Supports muscle recovery after intensive exercise
- ✓ Reduces muscle soreness and exercise-induced inflammation
- ✓ Improves sleep quality and regeneration
- ✓ Antioxidant protection against oxidative stress
- ✓ Helps maintain immune system balance during periods of increased physical activity

DIGITAL EYE STRAIN  
VISUAL SUPPORT AND EYE FATIGUE  
AGE RELATED EYE DISORDERS

*Vaccinium myrtillus L.*

*Lonicera caerulea L.*

*Aronia melanocarpa (Michx.) Elliott*

## What is OCULOXIN®

OCULOXIN® is a complex of standardized extracts from the fruits of *Vaccinium myrtillus L.* + *Aronia melanocarpa (Michx.) Elliott* + *Lonicera caerulea L.* It is an innovative complex of extracts with

an extended and synergistic range of active ingredients indicated for the regulation and improvement of various aspects of vision.

## Composition & Standardization

- **Anthocyanins (HPLC):** ≥25%
- **Iridoids:** ≥2%
- **Polyphenols (UV) also analyzed for additional standardization**
- Extract complex from *Vaccinium myrtillus L.* (bilberry), *Aronia melanocarpa (Michx.) Elliott* (aronia), and *Lonicera caerulea L.* (haskap berry)
- Form: fine black powder, suitable for use in dietary supplements
- Raw materials sourced from selected local plantations with strict quality control

## Recommended Use & Dosage

**Suggested daily intake:**  
300 mg

**Target groups:**

- individuals experiencing digital eye strain and eye fatigue (prolonged screen exposure)
- people with developing presbyopia
- individuals with early diabetic retinopathy
- people suffering from dry eye syndrome and age-related eye disorders

oculoxin.com

## Mechanisms of Action

- Anthocyanins improve blood flow regulation and protect vascular endothelium
- Enhancement of rhodopsin regeneration, supporting twilight vision and dark adaptation
- Antioxidant properties: reduction of oxidative stress and protection of retinal cells from ROS damage
- Anti-inflammatory effects: inhibition of NF- $\kappa$ B and IL-6 pathways, contributing to the reduction of ocular inflammation
- Cytoprotective activity: reduction of apoptotic markers (BAX,  $\gamma$ H2AX), protecting retinal cells against damage induced by blue light

## Benefits

- ✓ Supports visual performance and reduces symptoms of eye fatigue
- ✓ Improves microcirculation in the retina and choroid
- ✓ Enhances rhodopsin regeneration and adaptation to low light
- ✓ Protects the eye from oxidative stress and inflammation
- ✓ Contributes to maintaining eye hydration and reducing dryness

**CALMOMIX®**  
by Greenvit®

**SLEEP GOOD  
FEEL CALM  
LIVE WELL**

*Valeriana officinalis L.*

*Humulus lupulus L.*

*Melissa officinalis L.*

*Passiflora incarnata L.*

## What is CALMOMIX®

**CALMOMIX®** is a standardized complex of herbal extracts, rich in active substances with effects on the central nervous system (CNS). Vegetal component included in **CALMOMIX®**, demonstrate a multi-directional calming action. They act mainly on the nervous

system, and complementarily on the digestive tract, the vascular system and endocrine functions.

## Composition & Standardization

- **Valeriana officinalis L. root extract - DER 4-7:1, ≥0.8% valerenic acid**
- **Melissa officinalis L. leaf extract - DER 3-6:1, ≥5% rosmarinic acid**
- **Passiflora incarnata L. herb extract - DER 4-7:1, ≥2% flavonoids (as vitexin)**
- **Humulus lupulus L. strobile extract - DER 4:1**
- Form: fine brown powder, suitable for dietary supplement applications
- Extracts obtained from raw materials compliant with European Pharmacopoeia

## Recommended Use & Dosage

**Suggested daily intake:**  
300-600 mg

### Target groups:

- individuals suffering from nervous tension and irritability
- people experiencing difficulty falling asleep or poor sleep quality
- individuals under stress or exposed to anxiety-related conditions
- adults seeking natural support for relaxation and sleep improvement

calmomix.com

## Mechanisms of Action

- Modulation of GABA-ergic pathways, enhancing inhibitory neurotransmission in the central nervous system
- Reduction of sleep latency and improvement of sleep continuity
- Antioxidant activity and regulation of stress-related mediators (e.g., cortisol)
- Synergistic action of valerian, lemon balm, passionflower, and hops extracts leading to calming and sedative effects.

## Benefits

- ✓ Promotes calmness and relaxation in everyday stress
- ✓ Improves sleep quality and supports healthy sleep cycles
- ✓ Reduces nervous tension and restlessness
- ✓ Contributes to overall well-being without addictive effects

# Our Offer: Berries & Herbal Extracts

---

*The essence of nature  
in every drop.*

We offer standardized and based on DER extracts for pharmaceutical, nutraceutical, food and feed industries.

We specialize in European origin (mainly Polish) dried herbs and raw materials, such as Aronia (chokeberry), Elderberry, Lemon balm, Nettle, Hops, Horsetail, Thyme, White mulberry and many others.

Our extracts can be filtered, condensed and dried according to customers' requirements. We are able to manufacture botanical extracts in the forms of: liquid, dense/concentrated (soft), dry (powder). We use different extraction solvents, such as water, ethanol, propyleneglycol, glycerine, vegetable oils.

**Made in EU**

**TOP 10  
EXTRACTS**

## **BERRIES EXTRACTS**

- Aronia Berry
- Bilberry
- Elderberry
- Haskap Berry
- Tart Cherry

## **HERBAL EXTRACTS**

- Hawthorn
- Hibiscus
- Lemon Balm
- Mullein
- Valerian

## *Sustainability and Innovation in Nutraceuticals.*

After over eight years of research, in 2024 we launched the PureGreenLine™ membrane extraction line. This eco-friendly process ensures high purity and low energy consumption without the use of solvents.

### **Key benefits:**

- Low-temperature extraction – preserving full bioactivity
- Higher yield, lower carbon footprint
- Consistent purity and performance.

*Pure innovation.  
Pure quality.*
